

# AICP User Guide

From request to evidence-backed human review.

## What AICP does

Runs AI-assisted engineering work inside explicit budget, security and workflow boundaries.

## Start a run

Choose a project, task and recommended profile. Advanced settings never bypass Harness policy.

## Read the Overview

Start with release readiness, active work, blockers and observed evidence.

## Inspect a Run

Timeline, gates, findings, execution, budget, context provenance, attestations and audit are one drill-down away.

## Understand budget

Calls, tokens, estimated cost and physical fallback attempts are shown together.

## Understand gates
